

**HOW TO MAKE
“QUICK & AMAZING”
PROFITS WITH SPX 0 DTE TRADES**

WITH AL LOSADA

What You Can Expect

I am going to show you how you can make consistent **returns daily**, based on margin capital at risk or by **using SPX 0 DTE high probability trades**.

Without taking large losses, and make those returns month over month.

What You Will Learn

STRATEGIES FOR EXECUTING FAST TRADES FOCUSED ON IMMEDIATE PROFITS INSTEAD OF LONG-TERM HOLDS.

TECHNIQUES FOR LEVERAGING SMALL PRICE CHANGES FOR QUICK PROFITS, EVEN AS LOW AS 3 POINTS.

AN OVERVIEW OF THE SCALP TRADING METHOD, ENABLING RAPID ENTRY AND EXIT FROM POSITIONS.

AN IN-DEPTH GUIDE TO MICHAEL SCHMIDT'S ODTE FAST PROFIT APPROACH.

IDENTIFYING THE OPTIMAL TIMING FOR TRADE ENTRIES AND EXITS: MASTERING YOUR EXECUTION.

NAVIGATING THE PDT RULE: USING A CASH ACCOUNT TO ELIMINATE PDT RESTRICTIONS.

Michael's Bio

My name is Michael, and I'm a 41-year-old trader from Germany. As a proud father of four beautiful children, I balance my family life with my passion for trading. I've been a full-time trader for seven years, specializing in 0 DTE options, futures, and both long and short SPX positions.

My trading approach sets me apart from typical retail strategies; I focus on long positions in 0 DTE options and also actively trade short SPX positions. I'm captivated by the gamma explosiveness of these options, which allows me to capitalize on even the smallest market movements, often earning hundreds of dollars with each contract I trade.

STAY WITH ME
UNTIL THE END

SOS SPECIAL BONUS

BONUS

REASON 01

You are interested in learning new strategies that will take your trading performance to the next level so you can finally leave the 9-5 career behind

REASON 02

You've seen, heard about, read about others making money trading, and you know you can do it too but you're just not seeing your account grow fast enough based on your goals.

REASON 03

You've tried different trading strategies that you thought, "okay, this is it", only to discover it's just not getting you to that place of consistent trading results.

1: Interested in learning new strategies

2: Desire to see your account grow month after month

3: Find the right strategy that provides consistent trading results

IMAGINE

Imagine what it would feel like if most of your trades were winners month after month and it would be confirmed by watching the size of your account grow at the same time.

**Becoming the trader that no longer takes large losses
but consistently trades according to a proven trade plan
that is profitable over time allowing you to grow your
account month over month**

Profitability Factors

Market Direction - A market trending away from your position will cause the premium price to drop. If you enter this trade and the market moves against you or in the direction of the credit spread, you will see the premium price increase significantly.

But as long as it stays within an acceptable range, it will remain profitable

Risk Management Guidelines & Daily Routines

Risk Management

- Always trade with a plan
- Determine Max Loss and Risk/Reward before entering trade
- Trade no more than 20% (Credit Margin) of Trading Capital
- Do not allow more than a 2% loss/trade based on Trading Capital
- For highly trending market, position trades to follow the trend
- Size your trades to ensure emotions are not part of the decision making process - Trade small, trade often

Pre-Market Routine

- Review areas of support and resistance on the daily, 4 hour, 1 hour 5 minute and 1 minute chart
- Review /ES (Futures) Support and Resistance
- Review VIX level and Changes

Post-Market Routine

- Update the trade journal with key insights and observations.
- Review whether the daily monetary target was met; if not, analyze the reasons.
- If the target was achieved, assess if there are opportunities for further optimization.
- Evaluate if any adjustments or tweaks to the trading plan are needed.

FAST PROFIT SPX 0 DTE STRATEGY

Entry/Exit Guidelines

Enter 3 minutes after market open.

Buy an ATM put or call option.

Deeper ITM puts and calls offer higher delta (requiring a smaller market move to reach the profit target) but come with increased buying power requirements, making them more expensive.

Exit - Take Profit

Typically, we aim for a profit of +\$1.10 per contract, which is often achieved within minutes, sometimes even in under a minute.

Depending on market conditions, we may occasionally target higher profit levels.

Exit - Stop Loss

Exit the trade for a loss if the chart technicals no longer support the original strategy.

October 21

Michael Schmidt

Hi everyone! I've been talking to a lot of you over the last few days. I've more or less posted the following elsewhere and in personal conversations, but I want to make sure everyone reads it. The challenge some of you had last week was that I'm very patient with positions that go against us.

Trading is a very personal matter. This is my style, which has brought me a lot of success. Because it suits my personality. I can take a big loss. Because I have a high winning rate. And I know that I'll come back. But this is not for everyone. I understand this point. How I see this: I offer directional edge. Overall, 9 out of 10 trades reach target. I recommend to keep your eyes on the chart. Keep going through different time frames. And personalize things which fit your personality (and your account size). This can mean:

- Cut positions going against us earlier.
- Re-enter if direction confirms or wait for the next trade.
- Leave trades out you do not agree with (maybe you want to take only trades in the trending direction). Do not allow fear of missing out to push you into every trade.
- Trade more dynamic when it comes to winners. For example, if you see a rapid down move, leave the winning put on and don't take it off for -1.10. I heard traders in our channel say that they waited until the down move slows down (on a 1min chart or even lower time frame). Quite frequently, I hear that traders get \$400 or \$500 per contract out of that trade. But: Make sure that you don't let it turn red. This is the art here. Sometimes you can get a very sudden move against you. (If you're not an experiences scalper, I recommend trying this in paper first.)
- You also could use my trades just as an "indicator" and hop in only if you see it confirming in the chart.
- Or: Take only the 1st trade of the day and call it a day if it's a winner.

And there are many more ways to personalize my trades to better suit your personality. I also encourage you to use this channel and share with each other best practices. I really want to see you succeed!

And I'll work on having more only-winner-days again. Although you learn less, it makes things easier for everyone.

Tom, a professional high stake trader from Denmark, was asked about his reaction when is comes to lost trades. Interesting article. I don't agree with every single thing, but this stands out for successful traders as well as successful people in any other area: "I believe that the greatest sign of mastery is not how long it takes you to win, but how quickly you recover mentally from a loss."

Keith

Well, I only took the first trade 10 contracts from 12.50 to 13.70 and called it a day due to having to get on calls. So \$1,200 for me.
Thanks.

K

Came ready to play today, walked away green +\$541 (1 contracts). + \$1021 for the last 3 days, missed a few, still got my fulltime job, but can watch while busy. Trick is to just lay low the rest of the day unless Michael steps in last hour. Definitely learning as we go. Any extra tidbits welcome along the way. Thanks Michael!!!! God Bless!!!!

As of today.... even with the two RED Days on Sept 20th... and some mistakes and missed trades along the way, since I started trading with you Michael I'm \$5k in net profit JUST doing 1 contract trades! ❤️

18:25

Stan Wiley

Weeeeeeeell... I did a stupid move that cost me.... while waiting on E4 I did a call and got stuck in it. UGH. Just got out for a big loss but still in profit for the day. WOULD have been \$815 had I not gotten into that call... but still got out for \$162 for the day.... calling it a lesson learned!

19:10

Lesson learned = TRUST Michael!
LOL

19:11

I was just trying to hedge a little and make some extra while it was going against us. Oh well.

Wow. This has been outstanding. I am very glad I purchased this. The guidance is realistic and not "pie in the sky" BS like many of the programs I have reviewed. The risk is real and I know how to manage it now with a plan and have confidence that my trading will be consistent.

Patrick Connors

I have subscribed to your alert since November 18 2020 and just wanna say I enjoyed it very much and I learned so much from your knowledge. Your adjustment strategy is GOLD. My 7 dte and monthly account DTE grew from my initial capital 5000 usd to 10,000 usd as of now and I thank you for that.
