REASON 01

You are interested in learning new strategies that will take your trading performance to the next level so you can finally leave the 9-5 career behind

REASON 02

You've seen, heard about, read about others making money trading, and you know you can do it too but you're just not seeing your account grow fast enough based on your goals.

REASON 03

You've tried different trading strategies that you thought, “okay, this is it”, only to discover it’s just not getting you to that place of consistent trading results.

1: Interested in learning new strategies

2: Desire to see your account grow month after month

3: Find the right strategy that provides consistent trading results

IMAGINE

Imagine what it would feel like if most of your trades were winners month after month and it would be confirmed by watching the size of your account grow at the same time.

**Becoming the trader that no longer takes large losses
but consistently trades according to a proven trade plan
that is profitable over time allowing you to grow your
account month over month**

► SPX Credit Spread - What is it?

- A credit spread has a combination of **two puts or two calls** where the put or call that is sold **is more expensive** than the put or call that is bought
- SELL -1 29 AUG 22 4050/4040 PUT @.50 (Bull Credit Spread)
- Selling the 4050 Put and Buying a 4040 Put
- Trade is considered to be a High Probability Trade

SPX Options Rate of Decay

**From 68 days
to 33 days**

the rate of
decay is 34%

**From 33 days
to 5 days**

the rate of
decay is 57%

**From 5 days
to expiration**

the rate of
decay is 100%

Profitability Factors

Implied Volatility - The ideal setup is a market with volatility moving lower while in a trade.

Placing the trade when volatility is high and then decreases, will significantly reduce the initial premium collected.

Profitability Factors

Theta - Which is one of the greeks and measures the rate of decline in the value of an option due to the passage of time.

This is a big factor for short term options of 3 to 7 days.

Profitability Factors

Market Direction - A market trending away from your position will cause the premium price to drop. If you enter this trade and the market moves against you or in the direction of the credit spread, you will see the premium price increase significantly.

But as long as it stays within an acceptable range, it will remain profitable

Risk Management Guidelines & Daily Routines

Risk Management

- Always trade with a plan
- Determine Max Loss and Risk/Reward before entering trade
- Trade no more than 20% (Credit Margin) of Trading Capital
- Do not allow more than a 2% loss/trade based on Trading Capital
- For highly trending market, position trades to follow the trend
- Size your trades to ensure emotions are not part of the decision making process - Trade small, trade often

Pre-Market Routine

- Review areas of support and resistance
- Review US Dollar (\$DXY) for price action that can move the SPX
- Review 10 Year Treasury (TNX) Rates for price action that can move the SPX
- Review /ES (Futures) Trending Direction
- Review VIX level and Change
- Determine Credit Spread Positions and Save in TOS

SPX 0 DTE (DAYS TO EXPIRATION) STRATEGY

Pattern Day Trader

- **What is it** - the buying and selling or selling and buying the same security on the same day and initiates days trades three or more times in any five consecutive business day period
- **What can happen** - If your account value is below \$25k, your account can be restricted to only selling current holdings

Pattern Day Trader

How to avoid being flagged as a PDT Account:

- Limit trades to one trade, three days/week
- Manage trades from multiple accounts
- Trade wide Iron Condors and allow them to expire
- Trade with a cash account
- Trade ES Futures Spreads since it is not subject to PDT Restrictions

Entry/Exit Guidelines

Enter within 1-10 min of market open using a 5 to 30 wide spread (I trade 10 wide)

Use a Delta of .05 to .06 or a premium of .45 to .70 should be targeted

Wider spreads provides a greater distance to the market (less risk) price but also require additional margin (greater risk)

Exit - Take Profit

\$.10 for each spread

Closing the short strike @\$.05 (Commission free but still incurs PDT restriction and exchange fees)

Expiration

Don't allow a profitable trade to turn into a unprofitable trade.

Exit - Adjustment or Roll

Roll bull spread when within 5 to 10 points of threatened short strike

Exit - Stop Loss

Close bear spread when premium reaches 2x to 3x of credit.

▶ Trader Success Story

Al Losada is a great trading mentor, and I've been a part of his program for over a year now. He is very very patient, and my favorite strategies that he teaches us are the 7dte and Monthly SPX spreads. I'm finally able to make some monthly income trading!

Bruce Gardner

► Trader Success Story

Terrific service ! I've achieved slightly better than a 94% win rate since I started tracking, with documented gains in the 5-figures for a 31% gain in my options trading account in only 5 months. The best part is the risk management and post-trade management, KEY to any options trading plan. The subscription is money well spent and I highly recommend AI's service!

Glyn Norman

▶ **Trader Success Story**

"I started on 4 months ago and currently at \$22,092 in profits (not counting commissions) unlike almost every other trading system, AI has 100% transparency with his trades. He freely shares his spreadsheets showing all trades going back more than a year. Where else can you find that?? Honesty, transparency, win-rate, ... unrivalled.

Dale Goldwater

► Trader Success Story

I have been trading strictly 0DTE and 7DTE since October. Started with \$3K, now up to \$31K. Yes I have had to roll. Sometimes to save a trade, sometimes to collect earnings, and keep a good trade going. Even with some losses, I get them back. I have learned a lot from this group. Thanks to AL and Ike, and some of the big name traders in this group.

Russ Wood

► Trader Success Story

Following AI's lead, I turned a \$7,000 account into a \$26,000 account trading 2 to 3 contracts since January 20th, 2023.

Wow. This has been outstanding. I am very glad I purchased this. The guidance is realistic and not "pie in the sky" BS like many of the programs I have reviewed. The risk is real and I know how to manage it now with a plan and have confidence that my trading will be consistent.

Patrick Connors

I have subscribed to your alert since November 18 2020 and just wanna say I enjoyed it very much and I learned so much from your knowledge. Your adjustment strategy is GOLD. My 7 dte and monthly account DTE grew from my initial capital 5000 usd to 10,000 usd as of now and I thank you for that.
