TRADING WEEKLY EXPIRING SPX

Presenter

AL LOSADA

What You Can Expect

I am going to show you how you can make consistent **returns daily**, based on margin capital at risk or by using **SPX Weekly's high probability trades**.

Without taking large losses, and make those returns month over month.

THE NEW SPX STRATEGY

SimpleOption
Strategies

WHY I CHANGED THE STRATEGY

I was chasing too many strategies, which led to inconsistent results.

When I reviewed my long-term trading history, the most profitable trades were always the ones built on distance, theta, and simple rules.

So I returned to what works and refined it into a cleaner, stronger system.

▶ WELCOME & WHAT YOU WILL LEARN

What this strategy is

Understanding the core mechanics and principles for consistent income.

How the monthly cycle works

Navigating the 30-35 day window to create a steady theta ladder.

How entries, exits, and adjustments are made

Mastering the precise rules for trade management without emotion.

Why distance and theta matter

Leveraging time decay and strike distance for high probability.

What you will see today

A comprehensive walkthrough of the entire process.

account month over month**

➤ Why We Trade SPX Credit Spreads

DEFINED RISK, DEFINED REWARD

Limited risk & limited reward. Sell one option, buy another 25 points away, protecting from large loss while collecting set income.

MARGIN ACCOUNT REQUIREMENT

Requires a margin account. Broker uses small amount of funds to cover risk, cash accounts cannot trade this strategy.

TIME WORKS IN YOUR FAVOR

Time works in your favor. Each day option loses value, and that steady loss helps your trade as long as you stay far from market price.

HIGH-PROBABILITY SETUP

High-probability strategy. Trade makes money as long as SPX stays between strikes. No guessing direction, distance keeps things safe.

USES LESS MONEY TO PLACE THE TRADE

Strategy doesn't require lot of money. Spread limits risk, you can place trades without tying up too much capital.

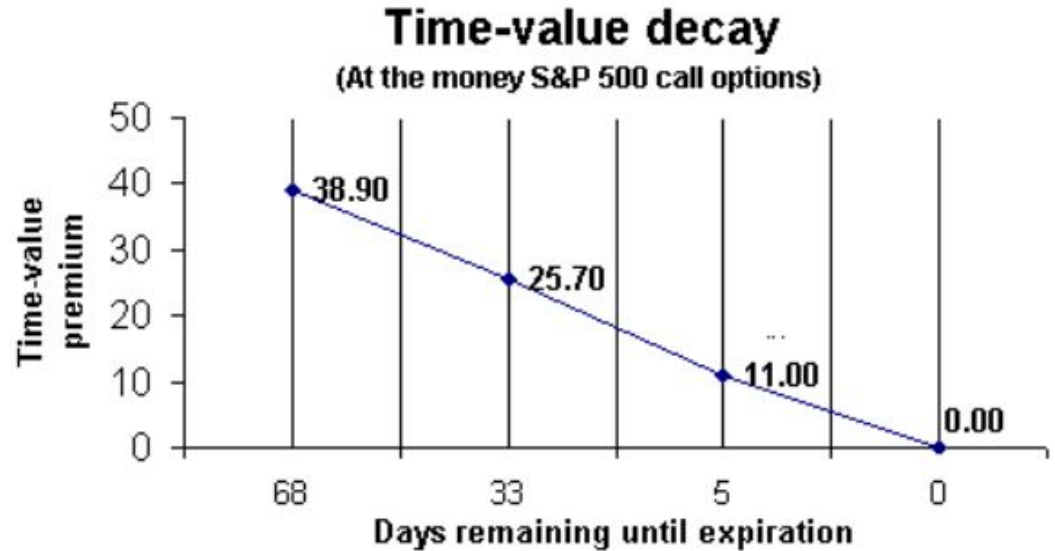

SIMPLE MECHANICS

Simple process: choose strikes, make them 25 points wide, collect credit, let trade work. Just follow rules and stay consistent.

SPX Options Rate of Decay

- From 68 days to 33 days, the rate of decay is 34%
- From 33 days to 5 days, the rate of decay is 57%
- From 5 days to expiration the rate of decay is 100%

Entry/Exit Guidelines

This 30–35 Day SPX strategy is designed for **steady, structured returns** by managing time — not predicting direction. Each week, new positions are layered to maintain multiple expirations and continuous theta income.

Enter trades **30–35 days before expiration** after the first 30–60 minutes of market action (around 10:00 AM ET). **Delta Targets:** 16 Δ put side and 8 Δ call side.

Credit Range: \$2.20 – \$2.40 per 25-point spread. Maintain **100–150 points** between the put and call sides for neutral balance.

Exit - Take Profit

Close positions between **\$0.10 and \$0.50 remaining** in premium.

Exit as soon as your profit target is reached — don't wait for expiration.

Typically occurs **7–14 days before expiration**, allowing room to add new cycles.

Risk Management

No hard stop losses — the system itself manages risk through **timely, mechanical adjustments**. The goal is **position control**, not reaction. Early rolls prevent deep drawdowns and keep the balance consistent.

Exit - Adjustment or Roll

Roll the threatened side when **SPX moves within 40 points of your short strike** or when delta exceeds **25**.

Stay mechanical — always roll **toward price**, not away from it.

Maintain **50–100 points of total distance** between call and put sides after the adjustment.

Roll within the same expiration whenever possible to preserve theta efficiency.

@AI_Losada

I want to express my sincere gratitude to @AI_Losada for your unwavering support and guidance. You've consistently taken the time to respond to my questions and private messages with clarity and patience, which has made a tremendous difference in my trading journey. Since joining this program, my experience has transformed. I went from facing a significant loss of over \$20,000 during the April crash to now projecting a positive gain of approximately \$50,000 for the year. This turnaround is not just financial—it's emotional and strategic. Your insights have helped me navigate volatility with confidence, refine my decision-making, and stay disciplined during uncertain market conditions. I've learned to approach trades with a more structured mindset, and that's directly due to your mentorship. Thank you for being a consistent source of wisdom and encouragement.

The image shows a landing page for 'AI Losada's SOS Trade Alerts'. On the right side, there is a portrait of a man in a dark suit and light-colored shirt, smiling. The background is a blurred office environment with desks, computers, and plants. On the left side, the text 'AI Losada's' is positioned above the main title 'SOS Trade Alerts'. Below the title is the subtitle 'Generate Consistent Income from Options Trading'. At the bottom of this section, there are two buttons: an orange button labeled 'Join SOS Trade Alerts' and a white button with a grey border labeled 'Member Login'.

Wow. This has been outstanding. I am very glad I purchased this. The guidance is realistic and not "pie in the sky" BS like many of the programs I have reviewed. The risk is real and I know how to manage it now with a plan and have confidence that my trading will be consistent.

I have subscribed to your alert since November 18 2020 and just wanna say I enjoyed it very much and I learned so much from your knowledge. Your adjustment strategy is GOLD. My 7 dte and monthly account DTE grew from my initial capital 5000 usd to 10,000 usd as of now and I thank you for that.
